

2nd International Ragweed Conference

March 28-29, 2012, Lyon, France

The conference will focus on the theoretical and practical aspects of the spread of ragweed. Basic research together with field applications will be emphasized, along with laboratory, pilot, and modeling studies leading to innovative approaches. Platform and poster presentations will be selected by the scientific committee from abstracts submitted for consideration

The number of participants is limited to 100 - we advise you to register early

Titles of Abstracts are due December 15, 2011

Complete Abstracts are due January 15, 2012
